

Mobile Access to UpToDate is Now Available

UpToDate mobile and remote access is now available to all Northwestern Medicine clinicians and students.

Northwestern clinicians can register when accessing UpToDate through the integrated link in Cerner or Epic. Registration gives you:

- **Free UpToDate Mobile App** for your iPhone®, iPad®, Android™ or Windows 8 devices.
- **Fast and easy access to UpToDate by logging in from any computer with an Internet connection.** With your user name and password you'll get the evidence-based clinical information you need from home, the office or wherever you are!
- **Effortless CME credits when you research a clinical question using UpToDate onsite or remotely** – including on your mobile device.

Please note: If you are already registered with UpToDate, please use UpToDate once via Cerner or Epic before you download and use the mobile application. If you do not have access to Cerner or Epic, you can still register for UpToDate mobile access by signing in through the Galter Library home page and accessing UpToDate/creating an account from there.

For more details, see the [UpToDate Mobile Access Guide](#).
