Galter Health Sciences Library & Learning Center

Expansion of the Clinical Librarian Service at Galter Library

Galter's Clinical Librarian Service (formerly Clinical Informationist Service) has expanded its rounding services and now provides virtual rounding support to the departments of Medicine and Dermatology. This Fall the Clinical Librarian Service (CLS) also launched support via chat, text, and email available to Feinberg clinicians, faculty, fellows, residents and students working in inpatient and outpatient settings.

Meet our Clinical Librarians:

Corinne Miller, MLIS

Denise Nunes, MS RN, MSLIS

Formed in 2015, the CLS improves information access in clinical care decision-making settings by embedding Clinical Librarians in patient rounds and Morning Report. Galter's Clinical Librarians conduct searches in real time to connect clinicians with trusted resources and support evidence-based clinical practice. The expansion of Galter's Clinical Librarian Services was conducted by CLS team members, Corinne Miller, MLIS, and Denise Nunes, MS RN, MSLIS, with invaluable support from Aashish Didwania, MD, Vice Chair for Education and professor of Medicine, Bruce Henschen, MD, MPH, associate professor of Medicine, and Cuong Nguyen, MD, assistant professor of Dermatology.

Connect with CLS

- Chat with us Monday – Friday from **10am – 3 pm.**
- Text us at **847-512-3502** Monday – Friday from **10am – 3 pm.**
- Email us at clinicalquestion@northwestern.edu
- For more information visit Galter's Support for Clinicians webpage .

Examples of Questions for the CLS

CLS welcomes inquiries related to therapy, diagnosis, prognosis, etiology, guidelines, and any additional areas related to clinical care. CLS has aided teams by providing evidence for the following questions:

- In patients with E-cigarette- or vaping-use-associated lung injury (EVALI), what are the radiographic findings and clinical presentation?
- How should hemodialysis be managed for pregnant patients with ESRD and severe hypertension?
- How often do we see multiple myeloma without a protein gap in the peripheral blood?
- What is the incidence and usual onset time of beta-lactam neurotoxicity?
