

MeSH on Demand

MeSH on Demand

The National Library of Medicine has announced the availability of "[MeSH on Demand](#)", a new tool that uses the [NLM Medical Text Indexer](#) (MTI) to find MeSH (Medical Subject Heading) terms.

The tool was developed in response to the perceived need that it is desirable to find MeSH terms directly from text such as an abstract or grant summary. MeSH on Demand has been developed in close collaboration among various NLM units (MeSH Section, NLM Index Section, and the Lister Hill National

Center for Biomedical Communications) to address this need. Use MeSH on Demand to find MeSH terms relevant to your text up to 10,000 characters.
