

## On-Demand Training from the NIH: Standardize Your Research with the NIH Common Data Element Repository

---

The popular NIH training is now available on-demand

- Have you been awarded a grant that requires the use of Common Data Elements (CDEs)?
- Do you want to learn if there are CDEs already in existence that you can use to describe your research data?
- Do you want to learn if CDEs can help you with your NIH Data Management and Sharing plan?

The NIH is offering its popular class, [Standardize Your Research with the NIH Common Data Element Repository](#), in an on-demand format. The class includes recorded videos and hands-on exercises.

The class is available from the National Library of Medicine (NLM). You simply have to register for a (free) NLM account to access the content.

---

### Data management resources from Galter Health Sciences Library and other Northwestern units

If you're interested in other data management and sharing resources available to Feinberg researchers, there is a growing number of resources available from Galter Library, NUIT Research Computing, and Northwestern Libraries

- Check out [Galter's Data & Data Management GalterGuides](#)
  - Learn more about Galter's [DataLab](#)
  - Discover NUIT's [Research Computing and Data Services](#)
  - Find other [data finding and management guides available from NU Libraries](#)
-
