Diversity, Equity, and Inclusion Working Group

Galter Health Sciences Library & Learning Center is committed to addressing diversity, equity, and inclusion (DEI) within the Library and with the Feinberg community through concrete, strategic actions, starting with those outlined below. Through this work, Galter Library's DEI Working Group aims to support DEI at Feinberg School of Medicine by fostering a culture of belonging and inclusion for faculty, staff, students, and trainees on campus and in our community.

1. Environment: Establish, develop, and support library programs and spaces that create a welcoming, inclusive, and equitable environment.
2. Policies, procedures, resources: Audit internal and external library operations to identify biases and inequities; target and work to meet potential diversity, equity, and inclusion needs; and continue intersectional conversations through library strategic planning. Furthermore, we commit to cultivating a diverse pipeline for recruitment from underrepresented groups and maintaining mindful hiring practices.
3. Feinberg initiatives: Engage with Feinberg and NU partners to enhance and support initiatives that meet diverse needs with far-reaching impact for our campus and community.

As a health sciences library, Galter supports scientific research, truth, and the equitable dissemination of information while striving to eliminate barriers to accessibility. Here, we apply this expertise to address issues of social justice through an intersectional lens; looking at the multiple, varied, and layered forms of discrimination and privilege. The working group is committed to the continuous and thorough examination and dismantling of systemic racism and inequities.
