Diversity, Equity, Inclusion, and Accessibility Working Group

Galter Health Sciences Library & Learning Center is committed to promoting diversity, equity, inclusion, and accessibility (DEIA) and supporting the Feinberg community through concrete, strategic actions, starting with those outlined below. Through this working group, we aim to support DEIA at Feinberg School of Medicine by fostering a culture of belonging and inclusion for all patrons including faculty, staff, students, and trainees.

1. **Environment**: Establish, develop, and support library programs and spaces that offer a welcoming, inclusive, equitable, and accessible environment for everyone.

2. **Policies, procedures, resources**: Audit internal and external library operations to identify potential inequities in existing policies and procedures; target and work to meet the required DEIA needs; and continue intersectional conversations through Galter Library’s strategic planning.

3. **University-wide initiatives**: Engage with Feinberg and other partners at Northwestern University to enhance and support initiatives that meet DEIA needs of our campuses and community.

As a health sciences library, Galter supports scientific research and the equitable dissemination of information while striving to eliminate access barriers. The DEIA working group facilitates Galter’s application of this expertise to address issues of social justice through an intersectional lens by looking at the multiple, varied, and layered forms of discrimination and privilege. The DEIA working group is committed to the continuous and thorough examination and dismantling of systemic racism, ableism, and inequities.

Members of the DEIA Working Group are aware that we do not speak for all members of the Northwestern University community, nor do we have all the answers to longstanding problems. We further acknowledge that our perspectives and efforts may miss the mark at times, and welcome feedback and suggestions.
