As a Data Librarian, I develop and implement workflows to promote inclusive practices aimed at advancing research data management and sharing. I support the Zenodo project through the NIH Generalist Repository Ecosystem Initiative (GREI) which is dedicated to enhancing the accessibility and discoverability of data. I also serve as an Evaluator and Data Analyst for the [NNLM National Evaluation Center \(NEC\)](#), supporting best practices and continuous improvement aimed at enhancing equal access to health information. Motivated by my commitment to knowledge equity, I specialize in project management and quality assurance that seeks to prioritize and understand the needs of data owners, consumers, and professionals.

NIH Generalist Repository Ecosystem Initiative

The mission of [GREI \(Generalist Repository Ecosystem Initiative\)](#) is to establish a common set of capabilities, services, metrics, and social infrastructure amongst the generalist repositories; raise general awareness, and facilitate researchers to adopt [FAIR](#) principles to better share and reuse data.

Areas of Interest & Expertise

- Data Analytics and Visualization
 - Data Management System Design
 - Data Collection Workflows
 - Strategic Planning and Communication
 - Program Evaluation
 - Continuous Improvement
 - Project Management
